# Plant EVERGREENS

FOR YEAR ROUND BEAUTY

## VARIETIES AND DESCRIPTIONS

**EUROPEAN LARCH.** Bright green feathery foliage. Deciduous. Prefers moist soil. Slender, pyramidal form. Very fast growing.

**JAPANESE LARCH.** Similar to the European type but not as pyramidal in shape. Very fast growing. Deciduous. Moist soil.

**AUSTRIAN PINE.** Vigorous grower. Long dark green foliage. Mature trees present a picturesque aspect. Hardest of the pines. Thrives in sandy soil. Best variety for seashore planting.

**JACK PINE.** Slender, spreading branches, forming a broad open head. Mature trees present a picturesque aspect. Hardest of the pines. Thrives in sandy soil. Best variety for seashore planting.

**RED PINE.** Dense foliage, beautiful, long deep-green needles. Rapid growing. Will thrive in dry soil. Requires sunlight.

**SCOTCH PINE.** Rapid growing and very ornamental. Light gray-green foliage. Will grow in poor soil and adverse conditions. Good for screens where quick growth is desired.

**MUGHO PINE.** Dwarf, slow growing. Hardy everywhere except in wet soils. Very compact tree of pyramidal growth. Grows to a height of 20 to 30 feet. Prefers medium wet soil.

**COLORADO BLUE SPRUCE.** Ranges in shade from slightly blue-green to mar-velous blue. The handsome ungrated, short-leaved tree, native of Colorado. Grows in any soil. Prefers sunlight.

**ENGELMANN SPRUCE.** Leaves blue-green to steel-blue. Flowers purple. Fully as beautiful as the Colorado Blue Spruce but not as widely known. Good moist soil.

**NORWAY SPRUCE.** Graceful, symmetrical tree of rapid growth. Pendulous branches, dark green foliage. Makes excellent hedges and windbreaks and is widely used for Christmas trees. Will grow in shade in either light or heavy soil.

**WHITE SPRUCE.** Upright and symmetrical; light silvery-green foliage. Makes good hedges and windbreaks. Will stand clipping and pruning. Prefers heavy soil and will grow in partial shade.

**JAPANESE YEW.** Very hardy. Matures at 5 to 8 feet. The spreading type is excellent for foundation plantings, and the upright form is recommended for formal or specimen plantings.

**AMERICAN ARBORVITAE.** Also called White Cedar. Excellent for hedges and windbreaks. Dark green foliage. May be pruned back to any desired height. Prefers moist soil.

**SIBERIAN ARBORVITAE.** Symmetrical, compact grower. Dark green foliage. Matures at 6 to 8 feet. Requires good moist soil.

**GLOBE ARBORVITAE.** Dense, dark green foliage. Round compact form. Matures at 3 to 4 feet. Good soil.

**PYRAMIDAL ARBORVITAE.** Columnar shape. Very popular for formal plantings. Grows to 15 to 20 feet. Rich soil.

**RED CEDAR.** Pyramidal shape. Valuable for formal work where height is needed. Good soil.

**PLUME CYPRESS.** Bright green foliage. Conical growth. Moist soil.

**BALSAM FIR.** Symmetrical, fragrant. Flat blue-green needles. Needs moist soil. to heavy soil and will thrive in shade.

**CONCOLOR FIR.** Blue-green needles. Pyramidal growth. Rapid grower. Medium soil.

**DOUGLAS FIR.** Soft dark green to gray-blue needles. Rapid growth. Grows to about 70 feet. Medium to moist soil.

**FRASER FIR.** Shining dark green leaves with white bands underneath. Grows to about 70 feet. Medium to moist soil.

**CANADIAN HEMLOCK.** Lacy, graceful foliage—easily pruned. Prefers shade, but will live in sunlight. Moist soil.

**SAVIN JUNIPER.** Low bushy type. Excellent for foundation planting. Good rich soil.

**PFITZER'S JUNIPER.** Broad, bushy habit. Grows in either shade or sun. Bluish-green foliage. Very popular for foundation work. Good soil.

**GREEK JUNIPER.** Dark, bluish-green foliage. Pyramidal growth. Rich soil.

**IRISH JUNIPER.** Distinguished for its grayish-green needles which turn to an unusual purplish color after the frosts in the fall. Low, spreading growth, height about 15 to 18 inches. Medium to rich soil.

**ANDORRA JUNIPER.** Distinguished for its grayish-green needles which turn to an unusual purplish color after the frosts in the fall. Low, spreading growth, height about 15 to 18 inches. Medium to rich soil.

weights: (Approx.) 3 and 4 year, once transplanted trees, average 10 lbs. per 100 trees—5 year, twice transplanted trees average 20 lbs. per 100 trees—6 year, twice transplanted trees, average 25-40 lbs. per 100 trees.

## OUR TREES ARE GUARANTEED TO LIVE

## AND COST NO MORE

● They are guaranteed because they have been transplanted every two years. Because this transplanting produces an abundance of fibrous roots which you do not find on trees which have not been properly transplanted.

Because they have been started in our rigorous climate and have withstood temperatures of 50 degrees below zero to 100 degrees above zero.

We intend to stay in the Nursery Business. We want friends and satisfied customers. We offer you only the best trees—trees that will live.

### PLANTING AND CARE

To plant the small trees, use a shovel or spade and dig a hole large enough to accommodate the roots when they are well spread out. Put a little water in the hole, pack the soil around the roots, keeping them well spread. When the hole is filled, pack the earth down firmly so that no air can get to the roots to dry them out. Be very careful between the time you receive the trees and the time you plant them not to let the roots dry out or get too dry. If you are planting the trees in your garden, let them grow a few years before putting them in their permanent location. Keep them about a foot apart for a few years and then put them in their permanent location at the end of two years. Be sure to transplant them again, planting them two feet apart.

### OUR POLICY

of fair dealings with our customers has built our business from an output of 20,000 trees ten years ago to an output of 2,000,000 trees in 1935.

### Our Guarantee

Every tree sold by us from this price list that does not live will be replaced absolutely free of charge. Notify us of the number of dead trees you have, if any, before October 1, 1936. Shipments of replacements will be made by parcel post prepaid.

We do our part. YOU must do yours to make your trees live. Get them promptly from the express company. Unpack and plant immediately.
